PROJECT INFORMATION

Purpose & Need for the Project:

Project Need:

Mono County has a high level of Deer Kill on the
State Highways, both in total number and
percentages of herds. The identified area around
Sonora Junction accounts for over 50% of the
identified kills.

Project Purpose:

Reduce the overall highway deer kill in Mono
County in total numbers and as a percentage of the
local herd. To demonstrate the viability of wildlife
crossings with exclusionary fencing as a viable tool
to increase highway safety and reduce impacts on
surrounding wildlife.
